

TouchTable Brochure

TouchTable

The First Truly User-Friendly MultiTouch Table

Discover TouchTable: the ultimate interactive touch table for collaboration, presentations and data visualization. Perfect for government, education and business.

What is TouchTable?

The TouchTable is an interactive touch table that allows multiple users to collaborate simultaneously on documents, maps, designs and more. TouchTable comes in 2 models: Standard with a mobile base, and Go as a portable variant. Both models are customizable & configurable, inquire about the possibilities.

TouchTable with interactive hotspots

Multi-touch: Supports up to 40 simultaneous touches for maximum interaction.

4K Resolution: Crystal clear display for an impressive visual experience.

Collaboration: Designed for multiple users to work simultaneously.

Flexible: Available in various variants such as base, screen size and software configurations.

Built-in PC: Powerful built-in computer with i5 or i7 processor, everything in one.
